The School Cases.

At the local court, on Friday last, the parents of about seventeen children of school age were summoned to appear to answer the charge of not having their children in regular attendance at the public schools in their respective school districts. One case was taken as a test case, that of Jacob Ulmer. After considerable evidence had been taken, defendant was fined \$10.00 and the costs of the court. At the close of the case, arrangements were made by the counsel to have the case appealed. The fate of the other defendants will depend on the outcome of the appeal in this case.

Mr. R. Andrew Smith, of the Attorney General's Department, appeared on behalf of the Department of Education, which prosecuted.

Mr. Parlee appeared for the defendants.

Holborn Drainage Scheme.

The proposed drainage district which will include Holborn is the cause at the present time of much discussion and inquiries from the residents of the area which it is intended to include when the preliminaries have been arranged. The three trustees necessary to form the Board are about to be elected, and further organization will be perfected when the Board meets.

Mr. G. W. Macleod, the well-known engineer, was appointed by the Government to make an examination of the entire layout, and report on the feasibility of the project. This report, and all the blue prints in connection with the scheme, may be seen at The Sun Office for a short time.

Stony Plain Literary Society.

The first regular meeting of the Stony Plain Literary Society will be held in the Town Hall on the evening of Monday next, October 9th, at 8 o'clock, and fortnightly on the same evening, at the same hour, through the winter.

The officers trust that many will become interested in the Society this winter, and that the membership will be as large as possible. The payment of 25c. makes you a member, and there is no initiation ceremony. All who attend the meetings and everybody is wanted will find the programs enjoyable and educative.

The whole program for the winter is being mapped out, and the committee working on the program would appreciate suggestions from anyone interested.

For the opening night we are expecting to have a lecture by Prof. Ottewill, B. A., from the Department of Extension, University of Alberta. All are welcome to this meeting, whether they desire to become members or not.

R. B. Brooks, B. A., is President, and J. H. Foerster, Secretary.

For Better Wells.

Mr. M. Schellenberger, this week brought his well-making outfit from across the river, where he had had a successful season. The rig is both a drilling and boring outfit, and is now located on the farm of Mr. Gueiting, near Holborn. The past dry season created a need for more wells, and those wishing a successful operation should communicate with Mr. M. Schellenberger, Stony Plain.

LOCAL NEWS.

John Ebschardt, who spent a short vacation with his parents, has returned to Edmonton.

Mr. D. L. McKinlay, the potato king of Comet District, on Saturday brought two sample tubers to The Sun office, the combined weight of which was 3 lb. 10 oz.

Misses White and Knight, from Edmonton, were visitors, Saturday afternoon at the Muri McKinlay ranch.

Evelyn Lipke left on Monday to join her mother at Moudis, Sask.

Inspector McNeil, of the Department of Education, gave the local School a look over last week.

Durward Meyer was in the City Friday, inquiring at the Department as to the result of his recent special exams.

Miss Robertson and Miss Regan have moved to the apartments over Kelly's new store.

Mr. Pidgeon of Duffield was in town all day Thursday last.

The local barracks of the A. P. Police has been equipped with a telephone, and she's the honey little instrument these days.

The Town Council holds its regular meeting in the Town Hall to-night.

Sunday's train from Prince Rupert was two and a half hours late.

Last Sunday was Sunday School Rally Day at the local Methodist Church, and the scholars took part in the evening services, and made a very creditable showing.

Mr. Horn entertained an auto load of friends from the city on Thursday last. It seemed to be a kind of garden party, as after the buildings had been thoroughly inspected, interest was centred on as to what the shrubbery contained.

The basketball players at the local school held a reorganization meeting and election of officers, and decided to hold games on the evening of every Tuesday and Friday. The first game was held on the School Square Friday evening.

Business is so poor in the farm-selling game now, that when you speak of a Quarter, an agent don't know whether you mean beef or land.

A new shop front was installed last week at the local Pharmacy, and this with the new lighting system in the store, have made a great improvement.

The Ingram Bros. Factory was closed for a few days, owing to a lack of lumber.

Attention is drawn to the very generous subscription offer on page six.

As we go to press, a wireless from Punkville in the Mountains says Red Barney is taking a blousing bawling.

Game licenses may be procured at The Sun Office.

Canada's Interest In Europe

For many generations back the people of Canada and the United States with but few exceptions held the view that they were but little concerned in the affairs of Europe and that what nations and people they might or might not do was of little importance to the residents of North America. Of course, men of affairs and those engaged in international trade and finance were better informed, but the great mass of people gave little heed to European quarrels and economies, except as matters of news appearing in the papers.

The Great War breaking with startling suddenness in 1914 was a rude awakening, and the humblest and most remote home on this continent was made to realize that the human family was one after all, and that what deeply affected the people in Europe was the immediate concern of all. Not merely during the war years but since the Armistice that lesson has been painfully impressed upon our people. True, a certain school of political thought in the United States still seeks to maintain the old traditional policy of American aloofness from all participation in European politics and affairs, and they were powerful enough politically to keep the United States out of the League of Nations, and also strong enough to foist upon the big Republic a renewed declaration and tariff policy calculated to shut out as far as possible all foreign goods.

The more observant, far-seeing, and best informed people realize, however, that in these modern times of instantaneous communication and means of rapid transportation, no nation can live solely unto itself. In matters of trade, for example, it is now recognized that not only must production and consumption be fairly balanced in a country in order to maintain a condition of prosperity, but that there must be an economic equilibrium maintained throughout the world. Production and consumption must go together if the balance is to be kept right.

Business goes well when the various productive elements are properly balanced, and when the various elements of consumption are in right proportions. A great producing country is also a great consuming country. If its equilibrium is maintained, but the substantial over-development or serious injury of any great industry throws the whole thing out of gear, and then depression and demoralization follow.

The world is suffering from such a situation today, because, on the whole, less is being produced than before the war, but there is a relative overproduction of farm products and raw materials. This is due, not to conditions in America, but because of the fact that Europe, the world's great manufacturing centre before the war, and the world's great market for farm products and raw materials, has partially withdrawn from her pre-war position. She is turning out very much less of manufactured goods than before the war. She is consequently unable to buy raw materials and farm products in normal volume from the United States and Canada. As a result there is depression not only in Europe but on this continent. We are, therefore, vitally interested in a revival of normal conditions in Europe and in everything that helps or retards it.

It is reasonable to expect improvement in Canada, even without improvement in Europe. This country, with its diversified industries, its wealth of resources, its great producing and consuming power, with its sound credit system, and its highly intelligent people, must forge ahead, and there is, therefore, no occasion for pessimism or lack of courage. None the less, we cannot have really satisfactory business or anything approaching real prosperity until Europe is decidedly on the mend. We are part and parcel of a great world economic system, and distress anywhere reacts on us.

Under these conditions there are those in Canada, as the enactment of the recent high tariff demonstrates there are many in the United States, who believe that a remedy is partly to be found in tariff enactments designed to protect ourselves. Statements made recently by a leading economist before the Missouri Bankers Association, have a bearing on this subject and are worthy of being quoted as emphasizing how vitally interested Canadians ought to be in the rehabilitation of Europe. Warning United States' farmers not to be misled into thinking that a protective tariff is going to benefit them, this student of economics said:

"Prices of wheat and cotton and hogs and other articles are determined, not in the domestic market, but in the great world market. Canadian wheat competes with American wheat quite as effectively at Liverpool as it does at Chicago, and with Chicago and Liverpool in cable communication a delivery of Canadian wheat at Liverpool will break the price at Chicago quite as effectively as if it came directly to Chicago. It does no good to keep Argentine wheat out of New York if that Argentine wheat can come to Liverpool and so limit the market for our wheat at Liverpool."

Which only goes to show how interdependent all countries are, whether of Europe or America. Instead of fearing an inflow of goods from Europe to America, this student declares it would be the most welcome thing that could come about, because a revival of manufacturing industry in Europe would immediately create a demand for the raw materials of all other countries, resulting in a revival of business not only in all agricultural and raw material producing countries. With such a revival their capacity to absorb manufactured goods would increase.

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Genuine

Small Percentage
It is said that only 20 per cent. of graduates from agricultural colleges till the soil, the balance preferring the professional classes. What seems to be a primary need is more overalls and less white collars.—Hamilton Spectator.

A Hundred Dollars Worth For Thirty-Five Cents

When you are awakened from a sound sleep by cramps, when without a moment's warning pain springs upon you, it's then you would really pay a hundred dollars for the quick relief you could secure from a thirty-five cent bottle of Castoria. What seems to be a primary need is more overalls and less white collars.—Hamilton Spectator.

Aluminum Long Hidden
The earth is one-thirteenth aluminum, yet this most abundant of all metals was scarcely more than a curiosity in the industrial world of twenty-five years ago.

THE WAY TO BE WELL

Good Health Maintained Through
Rich, Red Blood

There are many men and women who, every few weeks, have spells of nervousness, during which time they are little better than invalids; yet at other times they feel very well. Why does their health fluctuate so?

In the case of men and women, overstrained nerves are usually responsible for this state of unfitness and inability to face the activities of daily life.

As for women, her back aches, she is dizzy with sick headaches, and often has stabbing pains in the side. The only real health is all-the-year-round health; and the secret of it is good, red blood and plenty of it. "One way to keep the blood in good condition is to take Dr. Williams' Pink Pills. There is scarcely a nook or corner in Canada where someone will not be found who will tell you the benefit they have had through the use of these pills. And the reason is that through the improved condition of the blood they strengthen and tone up the nerves of worried, enfeebled men and women, and at the same time have given new vigor to pale, delicate girls and thin, weakly boys. The value of these pills in all run-down conditions is shown by the statement of Mrs. Lawrence Brown, Walton, N.S., who says:—"When I began taking Dr. Williams' Pink Pills I was in a weak, bloodless and nervous condition suffering from all depressing symptoms that accompany this run-down state of health. I had taken much medicine but it did not do me any good, and as I had a family of small children, I was much discouraged. Then reading about Dr. Williams' Pink Pills I decided to try them, and I can honestly say that I feel these pills have saved me from prolonged misery. My health is now good, and we now keep the pills in the house for use as a family medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Several Forms of Sugar

Many varieties of sugars exist, cane sugar, maple and beet. Failing these we have corn sugar under the name of glucose or dextrose, and the same in vegetable, fruits and honey. In a brownish powder we find it on prunes or raisins.

Lactose or milk sugar is another principal sugar, although it will never fill an important place in commerce. It exists in cow's milk, and plays an important part in nutrition.

It has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

From Past Experience

"If you go first," said the wife, "you'll wait for me on the other shore, won't you?"
"I suppose so, dear," he sighed. "I've never gone anywhere yet, what I didn't have to wait for you."

W. J. HUNTINGFORD

Editor and Proprietor of the Star, Wainwright, Alberta, who has been connected with the newspaper business in Western Canada for about 20 years, having owned and published papers at different times in Saskatchewan and Alberta.

Mr. Huntingford is immediate past president of the Alberta Press Association; and was prominent at the joint convention of the Alberta Press Association and B.C. and Yukon Press Association held recently at Vernon, B.C. Mr. Huntingford gave a summary of his time in the interests of the many newspaper men attending the Convention. The Convention was one of the most successful yet held.

The 1923 joint convention of newspaper men will be held at Jasper, Alberta.

Many have been relieved of corns by Holloway's Corn Remover. It has power of its own that will be found effective.

Whales Found on English Farm

May Have Ascended Small Stream
With Outlet to the Sea

Farm hands digging celery on a farm near Peterborough, England, recently came upon the skeletons of two whales, dating back, it is supposed, 10,000 to 12,000 years. The whales were lying side by side under the peat, and just embedded in the clay. It is conjectured that many thousand years ago these whales, and perhaps others, swam up a creek, when the wash came further inland, and got caught at the top of a spring tide in a place where they were unable to turn. Another theory has been advanced, though it is rather far-fetched: Some years ago a prehistoric boat was dug up in the same field, and the suggestion has been made that the crew of the boat was hunting the whales at that particular period.

Keep Minard's Liniment in the house

Next to grape wine it is said that Japanese rice wine is the oldest alcoholic beverage known to man, its use in Japan dating back over 2,000 years.

Says She Hasn't Felt So Well In Years

Mrs. Margaret Winton, highly esteemed resident of 713 Tenth Ave., West, Calgary, Alberta, pays glowing tribute to Tanlac for the wonderful appetite, perfect digestion and splendid health she has enjoyed. "I just can't say or do enough," she stated recently, "to show my appreciation of Tanlac for what it has done for me. Almost a year ago my appetite failed and my stomach became so disordered that nothing agreed with me. After every meal I would have severe pains in the pit of my stomach and bloated so badly I could scarcely draw a good breath. I ate so little and had digestion so bad that nearly all my strength and energy left me. My nerves were a wreck, too, and I could never get a good night's sleep."

"When I began taking Tanlac I was so run-down that I simply had to drag myself through the day and my housework was a dreadful burden to me. I also suffered with dull headaches and felt unwell for anything. But since taking Tanlac everything is different. I have a wonderful appetite, perfect digestion, and am enjoying splendid health. In fact, I have not felt so strong and well in years as I do now. Tanlac has won my life-long praise. Tanlac is sold by all good druggists."

Tragedy of Loneliness

One of the great absurdities of civilization is the fact that on every hand men and women are slowly dying of the cancer of the soul known as loneliness. There is something awesome but magnificent about the loneliness of mid-ocean. There is something terrible but inspiring in the loneliness of a mountain top. But loneliness in the midst of a crowd is one of the most dreadful tragedies to which humanity is heir.—London Daily Express.

ECZEMA You are not experimenting if you use Dr. Williams' Pink Pills for Eczema and Skin Irritation. It relieves at once and gradually heals the skin. Sample box Dr. Williams' Pink Pills for Eczema and Skin Irritation. Send for sample box, a lot of letters or testimonials, James C. Co., Limited, Toronto.

The Allied Debt To The United States From The Standpoint Of Equity

When considering this problem, however, we are faced with a fundamental question. That the debt is technically due, no one denies. But is it morally and reasonably due from the standpoint of equity? Let us look into its merits.

Most of us, I think, consider that even from the outbreak of the war the men of Britain and of the Dominions were fighting the battle of the United States, as well as of our own Empire, and of our Allies. We have all heard Americans also express that opinion. Though it took some years for their people, as a country, to recognize that fact, it was as true in August, 1914, as it was later when the gallant boys of both nations were fighting side by side. Germany aimed at world domination, and had she won the war, her political and commercial control of all Europe, all Africa and much of Asia, would have been at once established. She would have been the Colossus of the world. Her eyes were already fixed covetously on South America, and developments there would have followed rapidly. With the naval, military and financial resources then at her back, what would she have cared for the Monroe doctrine?

It would, however, be hardly reasonable to claim that the United States should have entered the war at its outbreak, for the people had to be awakened. It is doubtful if they were sufficiently informed as to the merits of the struggle prior to the Lusitania incident. What would have happened, however, if the United States had intervened then? The war would have been shortened by two years; millions of lives and tens of billions of dollars would have been saved; the condition of the world today would not be what it is, and this problem of the war debts would, in all probability, not have arisen.

When the United States at last threw its vast power into the scales that great addition to the cause of civilization and righteousness was decisive. When their Government did act, they acted vigorously and wholeheartedly. We are all unspcakably appreciative of the part played by them in bringing the war to a conclusion. It was some considerable time, however, after they declared war, before their armies could be organized, trained and transported to France, and during that period they could render but little help other than financial.

For whom, did the Allies sacrifice the lives of their men before the United States entered the war, and from that date until the American troops arrived? For all who did not wish a German world, for all free people, including Britain, Canada and the United States.

The war was fought not merely with lives, but with money. The financial burden fell chiefly on Britain. She had to advance huge sums to her allies. Had she not done so, Germany would have achieved a speedy victory, and the turn of the United States would then have come. Much of this money was spent in this country. Never before in the history of the world did any nation have such a stupendous stream of wealth poured into its lap. And this money was the life blood of nations who were giving their all, but not for themselves alone.

It is we right in believing that the United States had as great a stake in the war before she entered it as afterwards, we may well ask whether it is fair that the Allies should bear alone the crushing financial burden of even those earlier years, during which the United States accumulated much of the wealth of the world. Surely their awful losses in life, before the United States lost a single man, are enough of a handicap.

But the case is much stronger. The huge sums borrowed in the United States before April, 1917, are not in question. The debts we are considering are credits granted to the Allies by the American Government after it had itself entered the war. These advances were chiefly for munitions with which to fight the acknowledged enemy of the United States. Had the American armies been then in France, these guns and shells could have been used by them, but the Americans were

not yet there in force, and the Allied armies used them for the benefit of all. In doing this these French, British and other troops saved the Allied and American cause from defeat. The cause American shells were fired against the common enemy by British soldiers (great number of whom saved their lives in doing so), does it follow that they must also be paid for by British taxpayers?

It may perhaps be claimed that part of the money was used to feed the Allied troops and peoples. Can men fight, and at the same time cultivate their fields, or work at other occupations? We used to hear of American "soldiers of the soil," and were told that these men were fighting as truly as if they were in France. If they had been in France, there would be no talk of charging the Allied Governments for their services.

If the United States insists that Britain pay, Britain in turn must, of course require her debtors to pay. Do Americans exact payment from France, which has bled at every pore? The suggestion has also been made that Britain should transfer her West Indian colonies in payment of the debt. What would they think if Britain were to demand the transfer of some of the old French colonies in return for cancelling the debt of France to her?

Britain does not suggest that these crushing debts be cancelled unless the American people consider that such cancellation would be a reasonable part of their contribution. They do not wish the money to be written off as a bad debt. If the American Government considers that the money should be paid, I am sure that the British Government will pay to the last dollar, though it be necessary to add still further to the taxes on her already overburdened people.

Street of Many Languages

Representatives of Ten Nations on Short Street in New York

If you walk from one end of Jones Street, in New York, to the other you will take no more than 120 steps but in the course of that short walk you will pass between two rows of buildings that house 1,072 men, women and children. And if you listen attentively to the voices you will hear many languages—Italian, Irish, Polish, Russian, Greek, West Indian, Austrian, French, Spanish and now and then English. The inhabitants of Jones Street include representatives of ten nations. The houses on Jones Street shelter 528 children under sixteen years of age and of this number there are forty babies, 123 children between the ages of two and six, 228 children from seven to sixteen years of age, the remainder of the population consisting of 579 adults—290 men and 289 women.

Dairy Cow Record Breeders

Greater Interest Taken in Milk Production on the Part of Breeders

How interest has grown in the improvement of the pure-bred dairy cow is shown by the increased number of owners and breeders whose names figure in the report for 1921-22 of the Record of Performance of Pure-bred Cows kept and published by the Dominion Livestock Branch. In the report for 1919-20 the number was 247, in that for 1920-21 it was 336 and in 1921-22 it was no fewer than 469, making an increase of 90 per cent. in two years. This shows at once not only accelerated interest in milk production on the part of the breeders of dairy cows, but also in the economy of the dairy, seeing that the keeping of records has become widespread.

Only very youthful kids are available for the best and finest kind of kid-gloves. Once they begin to ex-grass their skins after in texture, becoming coarse in grain and losing to some extent the valuable quality of elasticity.

Planting Shelter Belts As A Preventative Of Droughts In The Prairie Provinces

"It's not the water we get in a dry country that is important; it's the water we keep," so said Principal Bracken, of the Manitoba Agricultural College, two years ago at the Swift Current dry farming convention.

A most important pronouncement this, on a most important subject for it crystallizes into one short, pithy sentence the secret of successful agriculture on the prairies. Given a sufficient rainfall there is no question about the crops. This is as well recognized as anything can be. And the converse is equally well known: decrease the water supply and the crops decrease in proportion, even to the vanishing point in some years.

But when we talk about keeping the water, these questions are naturally suggested, "How are we likely to lose it?" "What is likely to happen to it that we have to talk about keeping it?" and "Where is it likely to go?" We know where it comes from; the rain and the snow is the answer to that, but what becomes of that rain and that snow? That is the point, and following-up by implication, Principal Bracken's phrase, it is a most important one.

Take the snow first. We have heard of places where snow has been known to fall on the tops of fence posts and pile itself up to a depth of two feet, staying that way all winter waiting for wind to blow it off. That isn't the way it happens on the prairie. Usually the wind comes with it, and not only does it not stay on the tops of the fence posts, but often it does not even stay on the ground where it falls. Where there is stubble, a lot of it is caught and we are delighted to see it and begin to talk of the fine prospects for a crop next year. But six inches of stubble does not hold much snow. In fact, when

it comes to actual quantity of water preserved the six inches of stubble only holds about half an inch of actual rainfall. The balance blows away to form drifts in the coulees and the crests of the hills, where it melts in the spring and finds its way to the creeks or the sloughs.

Careful records are kept of the water we get, and have been for many years, but beyond that we have no information. Yet we all know Principal Bracken uttered a most profound truth when he emphasized the need of keeping our water. Surely it is time we gave some real attention to this matter. Anybody that has given it any thought knows that tree belts preserve moisture and might go a long way to help solve some of our dry farm problems if the proper steps were taken.

Is it not time something were done about it? Is it not possible to try it out on a scale big enough for a real test, say, a township or a section or two? Even if it only proves a failure it should be done. A great many people believe it would be of very great benefit at least locally, through the more level country.

So far nothing has been said about preserving the rainfall in summer, but we know Prof. King, of Wisconsin, found the evaporation from the soil to be from 25 to 65 per cent. less behind the shelter of a belt of trees, and Carlos Bates, found the saving to be as high as 70. These are important savings in a dry country. Is it not time something was done about it?—By Archbishop Mitchell, in Canadian Forestry Magazine.

Patronize your local merchants and thereby help to build up your home town and community.

Beautiful spots in Western Canada are not only to be found in the Rocky Mountains and on the Pacific Coast, but here and there along the Canadian Pacific Right-of-Way. Flowers in a riot of color adorn the station gardens throughout the entire system, but those on Western Lines always evoke favorable comment from the thousands of tourists who travel through the Prairie Provinces and British Columbia. The Canadian Pacific has made a specialty of its flower gardens and now that particular branch of work has almost reached perfection. Over 150,000 packages of seeds and 1,000,000 bulbs are sent each Spring to stations from the Atlantic to the Pacific.

Designing and work of these gardens is under the direction of G. A. B. Krook, B.Sc., Canadian Pacific Railway Horticulturist, Moose

Turkish Nationalists To Accept Principle Of Neutrality Of Straits

Constantinople.—The Turkish Nationalists will accept in principle the neutrality of the straits of the Dardanelles, pending an armistice conference to be participated in by British and Kemalist Generals.

Possible war between Great Britain and Turkey is at least temporarily averted by the declaration of the Kemalist. The declaration relieves the situation, which even the British had admitted was critical.

In a message to Kemal Pasha at Smyrna, General Harrington urged an early meeting of the British and Kemalist Generals at Mudanya or Ismid, as the most effective way of reaching an amicable understanding in the present difficult situation created by the Kemalist advance in the Dardanelles.

The message, which was most conciliatory in tone, declared it would be a pity at the present juncture to allow local occupations on the straits to jeopardize peace. Prior to an announcement that the Kemalist would accept the neutrality of the straits, Hamid Bey, the Ankara representative, said to the correspondent:

"The Kemalist naturally will come across the so-called neutral zones, but they have not the slightest intention of firing upon the British occupying those zones. If, however, the British move against us we will be forced to reply."

General Harrington replied to Kemal Pasha, thanking him for the declaration that he would respect the neutrality of the straits and that he wished to avoid a conflict. The British commander added that the destruction of which Kemal complained was prompted by military necessity and declared that he should have been fired against Turkey in anger nor would be except under his orders. He concluded by expressing readiness to meet Kemal at any convenient place to discuss an understanding.

Patronize your local Printer. It is poor policy to send your job printing out of town. It does not pay, no matter which way you look at it.

Coughs, colds, chronic indigestion and constipation are simply due to a weak condition of the mucous membranes. The way to get rid of these troubles is to take something which will build up the system and strengthen the stomach.

Feed Sheep On Screenings

10,000 Sheep Will Be Fed At Fort William

Winipeg.—Ten thousand sheep will be fed on screenings this year at Fort William and Westport by R. C. Harvey, of Lethbridge, the well-known sheep rancher, who was in Winipeg recently, after completing arrangements for the feed of his large flock.

He fed 7,000 at this point last year and found what had been regarded as a drop in the market could be profitably turned into prime mutton. Of this lot 4,000 were sold for shipment to New York and the remainder found a ready sale on the Toronto market.

Thinks Swearing All Right

Yes, providing the provocation equals the offence of Jones attempting on Smith's nose corns. Far better to use "Putnam's" Painless-Corn Extractor. It does lift out corns in a hurry. No corn can last if "Putnam's" is applied. Refuse a substitute, 25c every-where.

Mines Speeding Up

London.—The Koffy Fountain Diamond Mines of the Orange Free State are resuming full time operations after working on a five-day week basis since the slump in the diamond trade, says a Reuter despatch from Cape Town.

Dyed a Sweater

And Skirt With Diamond Dyes

Every "Diamond Dyes" package tells how to dye or tint any wool, faded garment or drapery a new, rich color that will not streak, spot, fade, or run. Perfect home dyeing is guaranteed. Use Diamond Dyes even if you have never dyed before. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is cotton or mixed goods. For fifty-one years millions of women have been using "Diamond Dyes" to add years of wear to their coats, shabby waists, skirts, dresses, coats, sweaters, stockings, draperies, hangings, everything!

Bermuda Struck by Hurricane

West Indies Island Sustains Heavy Damage in Storm

Halifax.—Damage, variously estimated at between \$200,000 and \$250,000 was caused by the hurricane which swept Bermuda on the morning of September 21, according to advices to the Halifax and Bermuda Cable Company here. Hundreds of houses were wholly or partially unroofed, wharves were washed away and roads gutted by a phenomenal tide. In exposed places stone buildings collapsed like houses of cards. It flooded the market square to a depth of three feet. St. George Hotel roof was blown in half. Many small craft were destroyed. There was no shipping at Hampton when the hurricane struck, but wide damage was done to small boats.

British Capital For Canada

Earl of Stafford Is Impressed With Opportunities in This Country

Saskatoon.—The visit of the British parliamentary party to Canada will probably have a great effect on the sending of British capital to Canada. In the near future, said the Earl of Stafford, who visited here with the Montreal Board of Trade party.

"We have had an opportunity to see your wonderful country for ourselves, and we are delighted with it," he said. "Although I am not able to make any statement as to the financial condition of the country, my impression is that things are looking up in Canada and that there is little reason to fear."

Will Provide Nurses

London.—Reuter's Sinala correspondent cables that the president of the Anglo-Indian (domestic) Europeans Association of India, has offered the Viceroy the services of his community in providing a contingent of nurses to be employed in the Near East in the event of an outbreak of war.

BANDITS MAKE BIG HAUL

ROB SAFES OF BANKS AT MOOSOMIN AND CEYLON, SECURING CONSIDERABLE BOOTY

Regina.—A gang of bandits held the safes of the Union Bank at Moosomin and the Bank of Montreal at Ceylon, making a clean getaway with \$14,700 cash, and \$16,000 in securities. The securities and \$7,000 in cash were taken from the bank at Ceylon and \$7,700 in cash in the Moosomin robbery. The robberies were carefully planned, the bandits placing sentries at points of vantage to stop any possible interference while the operators were at work with nitro glycerine on the vaults and safes.

Moosomin is 138 miles east of Regina on the C.P.R. main line, and Ceylon is about three miles west and 68 miles south of the city on the Radville-Bengough branch of the C.N.R.

Both bank buildings were damaged, over \$5,000 being the loss to the building and equipment at Moosomin, and over \$2,000 at Ceylon.

The bandits cut every telephone and telegraph cable leading into both of the towns, and at Moosomin bound John McDonald, C.P.R. night operator, taking him to the bank so that he would not be able to give any alarm. No other person was molested during the raids.

Three C.P.R. trains were stalled for some time at Moosomin during the night, while McDonald was held by the bandits. After they had left, the train continued on its way. The night clerk of the Queen's Hotel freed him by cutting the ropes. McDonald then dispatched the trains.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapiesin" Corrects Sour, Upset Stomachs at Once

"Pape's Diapiesin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness, fermentation or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages.

Official Killed in British India

Madras, British India.—Scott Coward, assistant district superintendent of the Madras Police Department, was shot dead from ambush in the Pudukkottai Hills. Three constables are reported to be missing. A band of about 300 rebels recently has been creating disturbances in the region where the ambush was laid.

Tokio—Jagan Will Proceed with her

program for the evacuation of the maritime provinces of Siberia, regardless of the breakdown of the Chang, Ching, conference, according to Masanoo Hasegawa, Japanese delegate to the arms conference at Washington.

Beecham's Pills

Constantine Succeeded By Crown Prince George To Throne Of Greece

NO MORE INDEMNITY PAYMENTS THIS YEAR

CONFERENCE IN DECEMBER TO SETTLE QUESTION OF FUTURE PAYMENTS

Paris.—The Allied Reparations Commission approved the German treasury notes for 96,000,000 gold marks delivered to the commission in payment of the August and September allotments due to Belgium. The notes were then forwarded to Brussels. The action of the commission formally disposes of cash reparation payments for the remainder of this year.

The question of payments for 1923-24 is expected to be settled at the forthcoming Brussels conference on reparations and inter-allied debts. It is planned to hold early in December.

No Cause For Worry WHEN CHILDREN HAVE Summer Complaints

There is not a summer passes but that thousands of men, women and children are attacked by summer complaints such as diarrhoea, dysentery, colic, cramps and pains in the stomach, cholera, cholera morbus, cholera infantum, etc.

In looking for relief you should not delay in getting a bottle of Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 77 years, and has stood the test of time.

Mrs. Geo. Chapman, Sudbury, Ont., writes: "I am the mother of five children and I must say they are seldom sick or in need of medicine. They are, however, sometimes troubled with summer complaint, diarrhoea, and such like, but I always find there is no cause for worry as I just give them two or three doses, no more, of Dr. Fowler's Extract of Wild Strawberry, and the trouble soon disappears. It is a remedy that all mothers should keep in the home for the children."

"Dr. Fowler's" is 50c a bottle; put up only by The W. M. L. Co. Limited, Toronto, Ont.

War Upon Drugs

Authorities Want All to Co-operate to Stamp Out Evil

Ottawa.—Co-operation between municipal, provincial and federal police forces; the formation of special "dope" squads in large cities, and eternal vigilance are necessary to stamp out the drug traffic in Canada, according to federal officials charged with enforcing the Opium and Narcotic Drug Act.

The act provides stiff punishment for dope traffickers and deportation is already provided. Canada has a careful system of checking legitimate imports and the distribution of the drug once it leaves the hands of the importers. But, according to federal officials, a certain amount of lethargy and lack of co-operation between the different forces is a handicap to the effectual stamping out of the scourge.

Montreal is at present the worst centre of illicit drug traffic in Canada, according to F. W. Cowan, who is chief of the branch of the health department enforcing the laws.

German Debt Increases

Berlin.—Germany's floating debt increased between September 10 and 20 by 19,473,000,000 marks. During the first ten days of September it increased 10,345,000,000 marks.

Einstein Goes To Japan

Berlin.—Prof. Einstein, the German scientist who evolved the theory which bears his name is scheduled to sail for a six months' lecture tour in Japan.

Denies Report of Suggested Alliance

Berlin.—The German Government has issued a denial of reported negotiations for a Russo-Chinese-German alliance.

Athens.—King Constantine, bowing to the will of the army and navy, has abdicated, and Crown Prince George, who married Princess Elisabeth of Roumania, becomes King of Greece.

A street demonstration by prominent citizens acclaimed Venizelos and a republic. There was some rioting and former Minister of Agriculture Sideris was wounded.

Constantine twice occupied the throne of Greece. His first reign began March 15, 1913, with the assassination of his father, George I, and continued until June, 1917, when he was forced by the demands of Great Britain, France and Russia to abdicate because of his pro-German sympathies.

He was succeeded by his second son, Alexander, who was nominated by the deposed monarch, and who had promised to carry out Constantine's policies, despite Allied demands to the contrary. For three stormy years Alexander reigned in name only. Then his tragic death in 1920, due to the bite of a poisonous snake, again turned the spotlight on Constantine, who had spent the intervening three years in exile with his large family.

A plebiscite had shown that the Greek nation was insistent upon the return of Constantine to the throne, and while the Allied Governments continued to exert every pressure at their command to prevent his re-ascension, the former King marched triumphantly into Athens and was crowned in December, 1920, amid scenes of the wildest enthusiasm.

Italian Settlers for Canada

Montreal.—Twenty thousand Italians will arrive in Canada early next spring, according to announcement made by the Italian shipping agent here. Many are returning after spending a couple of years in Italy following war years. The western provinces will get twenty-five per cent. of the newcomers.

Six thousand Rumanians are planning to come to Canada and start farming in the west.

Canadian Ship Requisitioned

London.—The British Government requisitioned the British Indian steamer *Manora*, and the Canadian Pacific steamer *Coriscan* as troopships to convey military details to the Near East.

A SIN TO LET HAIR FALL OUT

"35c 'Danderine' Saves Your Hair—Ends Dandruff! Delightful Tonic"

Hurry! It's your duty! Each day you see a little more hair falling out and you are making no effort to avoid baldness. What a pity. Falling hair means your hair is weak, sick—possibly dandruff is strangling it, or the hair root pores in the scalp are not firm and tight, thus wasting the hair-growing oils.

Danderine almost instantly stops falling hair of men or women and cleans every particle of dandruff away, then the hair takes on new life, vigor and strength to grow strong, thick and long.

Danderine is delightful—not sticky or greasy. It keeps your scalp cool and gets a bottle. Use it. Have healthy, heavy, beautiful hair and lots of it.

Turn In Your Bonds

Holders of 1922 Victory Bonds who have decided to exchange the maturing bonds for new bonds carrying the same rate of interest, under the proposals of the Minister of Finance, which are now being advertised, would do well to surrender their bonds at once. When the bonds were first issued in 1917, the 1922 maturity was a favorite with small investors, many of whom were buying bonds for the first. Consequently there are many thousands of individual holders, and it would be a great help to the banks and the Department of Finance in carrying thru the conversion expeditiously, as well as a convenience to the holders themselves, if they would turn their bonds in to the banks as early as possible.

Game Regulations.

Following are the open seasons on the game specified—

Deer, Moose, Caribou—
November 1st to December 14.

Ducks, Geese—
September 1st to December 14.

Game (Prairie chicken, Part-ridge, etc.)
October 16 to November 1.
Muskrat (North of North Saskatchewan River)—
December 1 to 31.

The Dollar Big Game License

Several inquiries have already been made to the local Game Guardians regarding the issuance of \$1 Big Game Licenses to farmers. This class of permits was abolished by the amendments to the Game Act passed at the last session of the Legislature. Section 19 of the Game Act now provides that:

"\$2.50 shall be paid by those who purchase a Resident's Big Game License, irrespective as to whether they are farmers or not. Formerly farmers were entitled to a Big Game License for one dollar."

It will be seen by this that there is no longer any provision for a farmer's big game license for \$1. All residents of the Province whether farmers or otherwise are required to pay \$2.50 for the privilege of hunting big game animals.

Why They Called Her Wheat

Grain Dealer to his Partner's Wife: "Why did you name the baby Wheat?"

Wife of Partner: "Because it was first cradled, later we shall thrash it and finally it will become the flower of the family."

On Account CANADIAN POWER FARMER

YOU GET THE AMOUNT OF THAT CHEQUE

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER, whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editorial staff consists of men thoroughly familiar with every branch of farming both from the practical and theoretical standpoint. Every month the magazine publishes experience men in by readers. Many of these are short cut findings that are real money savers to farmers.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly; then why not take advantage now, your subscription to this weekly together with a year's subscription to the CANADIAN POWER FARMER for the same price as this weekly alone. This is where you get the B.I.O. Mail your cheque or drop into our office the first time you are in town.

GET YOURS TO-DAY
—LINE GIVING YOU A CHEQUE FOR \$1.50—

MAGIC BAKING POWDER

Guaranteed to be the purest and best baking powder possible to produce. Because of the purity and high quality of the ingredients of Magic Baking Powder its leavening qualities are perfect and it is therefore economical.

E.W. GILLETT COMPANY LIMITED
WINDSOR TORONTO, CANADA. MONTREAL

WORLD HAPPENINGS BRIEFLY TOLD

It is possible that the Crown Prince of Japan may visit Canada and the United States in the near future.

Between 3,900 and 1,400 men are expected to be employed by The Pas Lumber Company, which contemplates carrying on logging operations on an extensive scale next winter.

Five workmen, employed by the Raleigh-Wyoming Coal Company at Glenrogers, W. Va., were killed when a hoisting bucket loaded with stone fell down a 700-foot shaft, crushing them to death.

The Washington Cabinet has decided to restrict prohibition enforcement operations within the three-mile limit at sea except in cases where ships beyond that limit are in communication with shore through their own crews and small boats.

The Prussian Minister of Commerce granted the Krupp Company permission to issue emergency currency to the amount of 400,000,000 marks. The note issue was limited to sixty days, the bills to be in denominations up to 500 marks.

Earl Spencer, one of the largest land owners in Great Britain, died Sept. 26. Last year he created considerable stir by the announcement that he was about to give up one of his homes on account of poverty and the high cost of living.

What is claimed to be the longest train of livestock ever received in Toronto from the West reached the Union Stock Yards, Toronto. The train was made up of 72 cars of cattle and made the trip to Toronto in 75 hours. Since August the movement of livestock from Western Canada to the eastern markets has been unusually heavy.

The Chinese Debt

The Chinese are optimistic; they believe they are going to get their present difficulties straightened out. Their total debt is considerably less than five dollars per capita for the population of four hundred millions, a position that compares favorably with that of most other nations.

A Corrector of Pulmonary Troubles.

Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Wireless and Weather

The most attractive theory as to the cause of weather in the North Temperate Zone attributes the birth of cyclones to a constant struggle between cold polar air and warm currents coming up from the south. Professor V. Bjerknes, the Norwegian proponent of this view, has insisted on the need of a complete chain of stations round the globe. The stations are now in existence, and are being linked by "wireless." We may be on the brink of a remarkable extension of scientific knowledge and of its practical applications.—London Times.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is directly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. P. J. Cheney & Co., Toledo, Ohio.

No man lives a useless life. He may serve as an example for others to avoid.

What Picnic Means

Word Originated From Custom Dating Back to 1802

Most people know what it is to enjoy a picnic; not all can tell how the name of this form of entertainment originated. The explanation, according to one derivation, is simple. When a picnic was being arranged it was the custom for those who were to be present to promise to supply food and drink. A list of the things necessary was drawn up and passed round, each person picking out the articles he or she would supply. The name of the article was "nick" on the list—that is to say, a mark was placed against it. The open-air entertainment thus came to be known as "pick and nick." The custom is said to date from 1802.

SAVED BABY'S LIFE

Mrs. Alfred Tranchemontagne, St. Michel des Saints, Que., writes: "Baby's Own Tablets are an excellent medicine. They saved my baby's life and I can highly recommend them to all mothers." Mrs. Tranchemontagne's experience is that of thousands of other mothers who have tested the worth of Baby's Own Tablets. The Tablets are a sure and safe medicine for little ones and never fail to regulate the bowels and stomach, thus relieving all the minor ills from which children suffer. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Methods Are Sound

Speaking of the Canadian dollar returning to par, the New York Herald, after specifying various reasons for this consummation, thus concludes: "Canada is prosperous because her finances and her business conditions and methods are sound. This naturally greatly enhances whatever value there may be in continuity to a well-to-do and friendly neighbor."

U.S. Tariff Will Prove To Be a Boomerang

Canada's Trade Will Be With Motherland Now, Instead of United States

Canada has paid very little attention to the new United States tariff, for the reason, as was pointed out by the Deputy Minister of Agriculture for the Dominion, that the bill passed a year ago made the exportation of many of our Canadian products practically prohibitive, and that any additional duties levied could not have any further effect.

It was pointed out by the Deputy Minister that the United States has not the power to injure our wheat exports, as we have a ready market overseas. On the contrary, the immediate effect of the emergency bill passed a year ago, has been that Great Britain has taken the place of the U.S. as the best customer of Canada. We must look more and more to the Motherland for a future market for our Canadian products.

NEW LAMP BURNS 94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (coal-oil).

The inventor, T. V. Johnson, 579 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

Britain Building Aerial Cruiser

The Race Between Nations in the Development of Aircraft

The Daily Chronicle's Aviation Correspondent, writing on the race between nations in the development of aircraft, refers to a British winged aerial cruiser now being completed by the Fairy Aviation Company.

Many features of it are official secrets. It is constructed of metal, develops not far short of 3,000 horsepower, and will be capable of long overseas flights without alighting for fuel. The weight is 15 tons.

Another lieutenant of the British Air Service, says the correspondent is a great winged troop transport with a hull of steel tubing, capable of carrying 25 soldiers with their full equipment for long distances.

"What Is the True Church?"

Who are given immortality.
The difference between the
Church and the World.

DUCHOLKE'S HALL.

Sunday, Oct. 8th.

Speaker, Mr. A. Yuill.

Seats free. No collection.

The Brummet Fire.

The fire on the Brummet
ranch at Golden Spike was
the cause of considerable anxi-
ety to the farmers in the
vicinity last week, a very
large number of them turning
out to help keep it under
control.

The big blaze is supposed
to have started from a camp
fire which several hunters
from Edmonton had been
using while camped on the
road allowance adjoining this
land, over the week-end of
Sept. 23.

A representative of the
Fire Warden's Dept. was out
on Saturday, investigating.

Announcement.

Dr. L. Faust Jones wishes to
announce that he has moved his
office to new quarters over Kelly's
new store and his residence to four
doors west of Oppenheimer's store.
Phone Residence No. 1. Office
"Kelly store."

Stony Plain and District

Mr. J. F. Clarke, the popular
druggist, has been confined to the
house for the past week, suffering
from an attack of peritonitis.

It is expected that Mrs. Out-
way's condition will be so improv-
ed by Saturday as to allow of her
being brought home from Edmon-
ton.

Mr. Chas. Holling and family
moved to Edmonton on Tuesday.

Several complaints have been
made on the poor condition of the
C.N. crossing at the Meridian Rd.
The general section boss, Mr. John
Messenger, has promised to give
it his attention.

The E.C.D. on Monday advan-
ced prices as follows: Special 38c,
No. 1 35c, No. 2 32c.

The U. F. A. local holds its regu-
lar meeting on Saturday even-
ing, October 7th, at the Royal
Hotel.

George Mitchell, Windsor, Ont.,
is visiting friends in this district.

Fire Prevention Day is Monday,
October 9, and it is proposed to
celebrate it in Stony by letting
the new water tank get full.

Notices have been posted by J.
Ducholke, chairman of the Stony
Plain Centre School Board, that
application will be made to the
Alberta Board of Public Utilities
for approval of a loan to be made,
for the purpose of purchasing a
site and the erection of a school
building.

While the Pitzer Bros. thresh-
ing rig was working last week on
the farm of Henry Kulak, on the
baseline, it was discovered that
several horsehoes had been con-
gealed in the sheaves, and these
entering the machines broke the
conaves. It is believed this had
been done by a member of a rival
threshing gang. The police are
investigating.

Premier Greenfield and his
Cabinet held a 3 day session in
Edmonton, last week.

Price of meals at Williams
Restaurant have been reduced to
21 meals \$7, or 40c a meal.

Bosserman's Trial.

Evidence given by Constable
Shelton, of the A. E. Police,
on Monday afternoon, in the
trial of John G. Bosserman,
charged with the murder of
L. Davies, at Rocky Rapids,
May 27 last, threw a new
light on the whole affair. The
evidence was a written state-
ment by the accused given to
Constable Shelton, and indicated
that the accused was acting in self defense.

On Tuesday the jury brought in
a verdict guilty of manslaughter,
and Justice Walsh sentenced Bos-
serman to twenty years' imprison-
ment.

Signs of Prosperity.

Perhaps the best indica-
tions we have before us in
Alberta that real business is
again opening, is in the de-
cision of the National Ry. to
start work in Edmonton on
their large western car shops,
and Imperial Oil Co. to erect
a large oil refinery at Calgary.

Will do your Crushing and Planing. No time
lost. Always ready for to give estimates on
any building. Here's where you get treated
all alike. Quick Service is Our Motto!
V. MOHR, Local Manager. An Old-Timer.

Exide Service Station.

Not so long ago all automobiles were
cranked by hand.

The year of 1911 saw the first car regu-
larly furnished with electric starting and
lighting equipment.

It had an Exide Battery.

Today millions of cars are Exide-equipped.

Why not you become one of these happy
users, with your next new Battery?

Prices, \$29.50, and up.

All Exides Are Guaranteed.

Stony Plain Garage,

Business Recovery.

Business barometers are all
pointing to better times. The
big coal strikes are settled.
The railway strikes are near-
ing adjustment. The recovery
is more noticeable on this side
of the Atlantic than overseas.

For food products the dol-
lar is going much further than
a year ago.

Transatlantic poverty has
been responsible to a large
extent for the depression in
grain prices.

Rumors of war sent the
price of wheat up a few cents.
We do not want war, but
grain raisers do want higher
prices for their products.

Western people are homely
enough in their way of think-
ing these days, to find it hard
to correlate the past year's
prices on wool and hides with
this year's prices of clothing
and boots.

Notices.

N. E. Shorten, Chiropractor, of
Edmonton, has arranged to be in
Stony Plain on Monday, Thursday
and Saturday, afternoons, from
1 to 4.15.
